Flag: Follow up

Hello Cody,

Attached is the Barnstable MOU with a few comments as follows:

- Pages 2 and 6, note that Oyster Pond and Oyster Pond Furlong are in Chatham not Barnstable. On page 2, first paragraph, last sentence, please check the % of total available N loading as you are referring to the Chatham site.

- Page 5, paragraph 5, can you work in the possibility of other options for the samplers.

- Page 6, paragraph 2, under Materials Management is referring to Chatham site. The Barnstable site has a marina parking area next to the Park walkway that is available for materials and equipment staging. A marked plan is attached for discussion.

- Page 6, paragraph 4, under Materials Management about the overgrown site is again referencing to the Chatham site.

- Page 6, paragraph 5, if the contractor removes fencing, they will be responsible for placing fencing back in place as needed and in the condition it was original in or better. If a section of fencing gets broken during construction replaced with new section of fencing. Planting associated with the gravel wetland cell is part of the working cell and will be planted by the U.S. EPA contractor.

- Page 6, paragraph 6, can "disposition" be change to reuse?

- Page 6, last line at bottom of the page has the pre-construction meeting "currently schedule for week of April 12". The contractor is talking about working on site starting April 6th?

- Page 7, paragraph 2, can the STEM programs like the one at the Cape Cod Marina Museum (next door to the site) and the Barnstable Schools be incorporated as part of the program?

Thanks,

Dale
